

New England Boatworks
Farr 40 Pre-World Championship 2013
New York Yacht Club
August 24 - 25

August 24, 2013

At the request of our long time sponsor Rolex, a camera boat will be placed on, or slightly below, the middle of the Starting Line. Due to the nature of the specialized camera equipment needed to film the starts, this camera boat will be rather large.....about 40 feet in length. The Race Committee and the Farr 40 Class Association understand the unique requirements of the film crew, and we urge all sailors to accommodate this special request by Rolex. Accordingly, the Sailing Instructions are amended below:

Amendment # 1 to the Sailing Instructions

Remove Sailing Instruction **10 THE START** and replace it with the following:

10. THE START

The starting line will be between a staff displaying an orange flag on the Race Committee Signal Boat and the course side of the white inflatable starting mark. A Rolex camera boat will be positioned near the center of the starting line. This boat shall be considered as a starting mark for the purposes of the RRS and shall be left to port or starboard while starting. However, it shall not be used to define the starting line as described above. Any incident resulting from the placement of the camera boat shall not be grounds for redress under RRS 62.1a.
